- **Conversation** - Basic

WORK EXPERIENCE

Senior Java Developer Analyst / Technical Lead
Gama Saúde/Qualicorp | November 2021 - Up to Now

- Working on the development of internal projects and features in existing applications, main demands of the Petrobras client for the Health management system.

- Development and Maintenance of Health Operation and Management systems, Portal for Providers/Accredited parties throughout Brazil that serve the Petrobras Health Plan.

- Responsible for solutions that require knowledge of the Legacy, due to the time spent in the company, I know all the current processes and systems.

- Main Technologies/Frameworks used: Java, Spring (MVC, Boot, Root), SVN, Git, Maven, Jenkins, Apache TomCat, Jboss, Jquery, Ajax, REST/RESTFULL, Bootstrap - Oracle Database

Senior Java Developer Analyst
Tecban | Abril de 2020 - November de 2021

- Developer on the project of migration of software technologie migration for 24-Hour ATMs, which was using software written in Visual Basic 6 and being migrated to Java..
- Main activities are reading, analyzing the Legacy system, and writing in Java.
- Main Technologies: Java 8 and Java 12, EJB, SpringBoot, REST APIs, JXFS (Legacy in VB6 and C)

Senior Java Developer Analyst / Technical Lead
Gama Saúde | April 2014 - April 2020

(Note: I currently still provide PJ services - Execution of Small Projects)

- Development of new features and support to the development team.
- Development and Maintenance of Processys WEB systems (Hosting and Operation of Health and Dentistry Management Systems) – Working on demands of the Petrobras and Vale do Rio Doce clients.
- Development and Maintenance of the system for managing medical/clinical documents (HCM/Account Manager), to control and distribute demands for analysis by doctors/nurses/analysts of medical bills from providers. (Like a workflow)
- Main Technologies/Frameworks used: Java, Spring (MVC, Boot, Root), Maven, Jenkins, Apache TomCat, Jquery, Ajax, REST/RESTFULL, Bootstrap - Oracle Database

Senior Java Developer Analyst
Tempo Assist | October 2018 - June 2019
(During this period, I continued to work for the company GAMA Saúde at night)

- Development of new features for the JUVO® system. This system is where you manage all electronic drives made to providers. (tow truck)
- Creation of functionality for better routing and Choose from the map the critical points and/or where you need tow trucks available for service.
- Create a routine for calculation and better choices of providers, in order to generate savings for the company.
- Main Technologies/Frameworks used: Java, Struts, Spring Boot, Maven, Jenkins, Apache TomCat, Jquery, Ajax, REST/RESTFULL, Bootstrap - Oracle Database

Senior Java Developer Analyst
BSI Tecnologia | July 2013 - April 2014

- Project 1: Development of an application for ALELO, control of benefits cards (ALELO Auto).
- Project 2: Development of new functionality in the Alelo Florida System, to serve Claro customers, self-registration system for the "Meu Dinheiro Claro" product.
- Main Technologies/Frameworks used: J2EE, Struts, Hibernate 2 and 3, JPA, Maven, Spring, IBM Websphere and JBoss

Pleno/Senior Java Developer Analyst
Banco Bradesco - DDS Alphaville | February 2007 - July 2013

- Development and maintenance of the FMDA System, a tool for controlling and validating Queries.
  - This system received in text format all the queries that would be executed in Bradesco's databases (Queries in DB2, Sql Server, Oracle and Teradata)
  - The system, supported by the modeling produced in ERwin, performed all the validations that had been previously registered and configured, to then identify possible points of failure or high execution costs.
- Main Technologies/Frameworks used: Java J2SE / SWING, ERwin, IBM Websphere - Sql Server, Oracle, DB2 and Teradata databases

Junior/Pleno Java Developer
Multitec Sistemas | April 2005 - January 2007

- Development of functionalities in your own ERP (SAM - Sistemas Administrativos Multitec) (Or in english translation -> (MAS - Multitec Administrative Systems)
  - Initially using Visual Basic 6 programming language and then migrating to Java J2SE / Swing and Java WebStart
- Main Technologies/Frameworks used: Visual Basic 6, Java - Sql Server and Postgree database
